Subject: RE: Aged Oil LSPI Data Review Meeting Minutes-5-24-2022

- Review status of attached for excel file. Still some outstanding significant digits.
  - Labs to see if they have the SD's for TAN/TBN/Oxidation/Nitration.
  - Provide by COB Wed if possible. Deegan to update and send to TMC for upload to TMC website.
  - Reviewed the SOT Chem data, need to look into R&R..

- Review chem data from SOT in excel file. Discuss differences.
  - Compare to IAR results.
  - Please all review and get back to Jason if anything may need to be rerun.

- Review initial LSPI results. Discuss next steps.
  - Run oils New in LSPI.
  - SwRI & LZ to look into running Oil B New to confirm Pass on LSPI.
  - Complete remaining LSPI.
  - Expectation is to complete next week.
  - OpData currently available will be reviewed as necessary.
  - Download the combined data set following completion at individual labs. ECD: End of next week.

- Setup Aged Oil LSPI SP timing.
  - Statisticians review of Aging data.
  - Timing to complete LSPI and run data.
  - To be reviewed next week, but expectation is to wait until all LSPI Testing is completed and spreadsheet is updated to include all data.

- Other items-Let me know if there is anything else we need to discuss.
  - None at this time.

Please let me know if I've missed anything. Thanks.

Sincerely,

M. D. Deegan
