#### Sequence IIIHA Form 3 Summary of Test Method

The Sequence IIIHA Test is a fired-engine, dynamometer lubricant test for evaluating automotive engine oils for certain high-temperature performance characteristics. Such oils include both single viscosity grade and multi-viscosity grade oils that are used in spark-ignition, gasoline-fueled engines, as well as diesel engines. The Sequence IIIHA Test utilizes a 2012 Chrysler Penstar 3.6 Liter, water-cooled, 4 cycle, V-6 engine as the test apparatus. The Sequence IIIHA test engine is an overhead valve design (OHV) and uses dual overhead camshafts operating both intake and exhaust valves. The engine uses two intake and two exhaust valve per cylinder. The test engine is overhauled prior to each test, during which critical engine dimensions are measured and rated or measured parts (pistons, rings, etc.) are replaced.

The Sequence IIIHA Test consists 90 hours of engine operation at moderately high speed, load, and temperature conditions. The 90-hour segment is broken down into four 20-hour test segments and one 10-hour segment. Following each 20-hour segment, the 10 hour segment, and the 10-minute operational check, oil samples are drawn from the engine. The kinematic viscosities of the 20-hour segment samples and 10 hour segment samples are compared to the viscosity of the initial sample to determine the viscosity increase of the test oil.

The Sequence IIIHA Test is operated at the following test states during the 90-hour portion of the test:

| Parameter                  | Set Point  |
|----------------------------|------------|
| Engine Speed               | 3900 r/min |
| Engine Load                | 250 N⋅m    |
| Oil Temperature, Block     | 151°C      |
| Coolant Outlet Temperature | 115°C      |
| Fuel Temperature           | 30 °C      |
| Intake Air Temperature     | 35 °C      |
| Intake Air Pressure        | 0.05 kPa   |
| Intake Air Dew Point       | 16.1 °C    |
| Exhaust Back Pressure      | 4.5 kPa    |
| Engine Coolant Flow        | 170 L/min  |
| Coolant Pressure           | 200 kPa    |
