CORRECTED REPORT PACKET REVISION NOTICE: VGC-20020201

VERSION: 20020201
EFFECTIVE DATE: May 9, 2002
DATE: April 11, 2002
TO: D02.B07 EOVC Participants
FROM: Tom Schofield

Please note that this is a CORRECTION to a previously issued notice. My VGC report packet revision notice of April 9, 2002, made reference to an incorrect version date for the new VGC report packet. The correct version to be implemented on May 9, 2002, is version 20020201. I regret the error and apologize for any inconvenience it may have caused.

An updated VGC (D5480) report packet has been approved by an Email ballot of the D02.B07 Engine Oil Volatility Tests Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. The ALTCODE and LABOCODE field lengths have been expanded and other minor changes were made to conform to ETRTM specifications. Please note the VGC report packet update is for reporting data by test method D5480 only.

The revised VGC report packet version **20020201** will replace the current version 19970416 effective May 9, 2002. Version 20020201 report forms (in PDF format), data dictionary, repeating fields specification and summary of changes (in text format) are available from the TMC's website:

<http://www.astmtmc.cmu.edu/>

(Select "FTP Directories for Data Dictionaries", then the "vgc" folder. The new report packet files can be found under the "beta" directory. They will be moved from the beta to the current directory on the effective date.)

Please direct any inquiries to my attention.

TMS/tms
