REPORT PACKET REVISION NOTICE: D5800-20020325

VERSION: 20020325

EFFECTIVE DATE: May 7, 2002

DATE: April 9, 2002

TO: D02.B07 EOV D5800 Mailing List
D02.B07 EOV D5800 Participants

FROM: Tom Schofield

An updated D5800 report packet has been approved by an Email ballot of the D02.B07 Engine Oil Volatility Tests Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. The revised forms have a new, standardized bench test heading, ALTCODE and LABOCODE field lengths have been expanded and the QC Sample Evaporation Loss (QCEVALS) field length has been changed to accommodate only one decimal place. Also, some of the field names and descriptions have been changed to standardize them across bench tests or to comply with ETRTM specifications.

The revised report packet version 20020325 will replace the current version 20000926 effective May 7, 2002. Version 20020325 report forms (in PDF format), data dictionary, repeating fields specification and summary of changes (in text format) are available from the TMC's website:

<http://www.astmtmc.cmu.edu/>

(Select "FTP Directories for Data Dictionaries", then the "d5800" folder. The new report packet files can be found under the "beta" directory. They will be moved from the beta to the current directory on the effective date.)

Please direct any inquiries to my attention.

TMS/tms
