

Volatility Surveillance Panel
Telecon: RR for D5800B Daily
Check Oil

September 18, 2014

Agenda

- Discussion/Voting on RR for D5800B Daily Check Oil
- Additional topics

Topics for Discussion/Voting

- Requirement that TMC monitored instruments use the new daily check oil for D5800B
- Sale of oil to non-TMC monitored labs
- Use of a reblend of VOLD12 (12.9% Noack target) for daily check oil
- Inclusion of results from only TMC calibrated instruments
- Inclusion of Procedure C in the testing
- RR information
 - Two runs per instrument
 - Three instruments if available (more tests appreciated, but not required)
 - Additional information from email
- Completion of testing by mid-December
- Any additional topics to discuss?

Additional topics (time permitting)
