REPORT PACKET REVISION NOTICE: D6082-20020311

VERSION: 20020311

EFFECTIVE DATE: May 30, 2002

DATE: April 23, 2002

TO: D02.B07 (D6082) High Temperature Foam Surveillance Panel  
D02.B07 (D6082) High Temperature Foam Mailing List  
D02.B07 (D6082) High Temperature Foam Participants

FROM: Tom Schofield

An updated D6082 report packet has been approved by an Email ballot of the D02.B07 High Temperature Foam Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. The revised forms have a new, standardized bench test heading, OINIT (Operator's Initials) has been removed, WBLDCAL has been changed to BLENDCAL, and ALTCODE and LABOCODE field lengths have been expanded. Also, some of the field names and descriptions have been changed to standardize them across bench tests or to comply with ETRTM specifications.

The revised report packet version 20020311 will replace the current version 20001002 effective May 30, 2002. Version 20020311 report forms (in PDF format), data dictionary, repeating fields specification and summary of changes (in text format) are available from the TMC's website:

<http://www.astmtmc.cmu.edu/>

(Select "FTP Directories for Data Dictionaries", then the "d6082" folder. The new report packet files can be found under the "beta" directory. They will be moved from the beta to the current directory on the effective date.)

Please direct any inquiries to my attention.
