MEMORANDUM: 06-065
DATE: September 29, 2006
TO: D02.B07 D6082 High Temperature Foam Mailing List
FROM: Tom Schofield
SUBJECT: D6082 Technical Update: Updated Test Method

Please be advised that a revised D6082 test method (High Temperature Foaming Characteristics of Lubricating Oils) is available from ASTM (www.astm.org). Effective immediately, the TMC will begin monitoring D6082-06 for future calibrations. The published 06 version contains a summary of changes from the previous version. The 06 summary of changes appears to address glassware and sample volume tolerances.

Please contact me if you have any questions.
