FROM: Tom Schofield

An updated D6417 report packet has been approved by an Email ballot of the D02.B07 Engine Oil Volatility Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. The revised forms have a new, standardized bench test heading and ALTCODE and LABOCODE field lengths have been expanded. Also, a field name (RUNNUM) and field description have been changed to agree with the other bench tests.

The revised report packet version 20020311 will replace the current version 20000928 effective June 11, 2002. Version 20020311 report forms (in PDF format), data dictionary, repeating fields specification and summary of changes (in text format) are available from the TMC's website:

<http://www.astmtmc.cmu.edu/>

(Select "FTP Directories for Data Dictionaries", then the "d6417" folder. The new report packet files can be found under the "beta" directory. They will be moved from the beta to the current directory on the effective date.)

Please direct any inquiries to my attention.
