REPORT PACKET REVISION NOTICE: EOEC-20060725

VERSION: 20060725

EFFECTIVE DATE: September 11, 2006

DATE: August 2, 2006

TO: EOEC Surveillance Panel

FROM: Scott Parke

During its July 18, 2006 teleconference, the EOEC Surveillance Panel revised its method of outlier handling. This change required that the description for several fields be changed to designate an asterisk (*) as an allowable value for several "A" data-type fields. A revised report package has been beta tested and is posted on the TMC web site as EOEC report package version 20060725. This report package will be in effect for tests reported to the TMC on or after September 11, 2006.
