REPORT PACKET REVISION NOTICE: GI-20050310

VERSION: 20050310

EFFECTIVE DATE: May 3, 2005

DATE: March 28, 2005

TO: D02.B07 GI (D5133) Mailing List  
D02.B07 GI (D5133) Participants

FROM: Tom Schofield

An updated GI report packet has been modified by request of the D02.B0.07 Gelation Index Testing Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. An operational data table has been added to the report forms adding seven new operational fields to be reported for TMC calibration tests. An additional editorial change to the data dictionary description for LABVALID was also made to conform to the standard reporting format. The version date was also changed to reflect the update.

The revised report packet version 20050310 will replace the current version 20020204 effective May 3, 2005. Version 20050310 report forms (in pdf and doc formats), data dictionary, repeating fields specification, summary of changes and flatfile template (in txt format) are available from the TMC's website:

<http://www.astmtmc.cmu.edu/>

(Select Report Forms & Data Dictionaries → Bench Test Areas → GI. The new report packet files can be found under the gi/beta/current directory. They will be moved to the gi/current directory on the effective date.)

Please direct any inquiries to my attention.

TMS/tms
