

## LDEOC/EOEC SURVEILLANCE PANEL

A LDEOC conference call was held on 8-13-15, at 9 am Central Standard Time. The following members were on the call:

Mike Kasimirsky – TMC  
Mike Lopez - Intertek  
Joe Franklin – Intertek  
Becky Grinfield – SwRI  
Rick Castro - SwRI  
Mike Birke – SwRI  
Udo Boecker – ISP  
Geifu Wu - Ashland

The purpose of the call was to inform the surveillance panel that there may be an issue with LDEOC batch 15 AEM. One lab has been experiencing failures with volume and tensile values. The other labs have been instructed to start testing as soon as possible. Once enough data points are submitted to TMC, another conference call will be held to determine if it is a batch problem, or an issue with the one lab.

The teleconference ended at 9:06 am.
