REPORT PACKET REVISION NOTICE: MTEOS-20020121

VERSION: 20020121

EFFECTIVE DATE: May 29, 2002

DATE: April 23, 2002

TO: D02.B07 TEOST Surveillance Panel  
D02.B07 TEOST Mailing List

FROM: Tom Schofield

An updated TEOST MHT-4 (MTEOS) report packet has been approved by an Email ballot of the D02.B07 TEOST Surveillance Panel and has been beta tested by the ASTM Data Communications Committee. The revised forms have a new, standardized bench test heading and ALTCODE and LABOCODE field lengths have been expanded. Also, the field name OPTEMP has been changed to TSTTEMP (to agree with other bench tests), and SAMINJWT has been changed from reporting a precision of 4 decimal places to reporting only two decimal places, in agreement with the test method.

The revised report packet version 20020121 will replace the current version 20001208 effective May 29, 2002. Version 20020121 report forms (in PDF format), data dictionary, repeating fields specification and summary of changes (in text format) are available from the TMC's website:

<http://www.astmtmc.cmu.edu/>

(Select "FTP Directories for Data Dictionaries", then the "mteos" folder. The new report packet files can be found under the "beta" directory. They will be moved from the beta to the current directory on the effective date.)

Please direct any inquiries to my attention.
