MEMORANDUM: 09-038

DATE: August 12, 2009

TO: D02.B0.07 TEOST Mailing List

FROM: Tom Schofield

SUBJECT: D6335 (TEOST) Technical Update – Updated Test Method D6335-09

A revised version of ASTM Standard Test Method D6335 (Determination of High Temperature Deposits by Thermo-Oxidation Engine Oil Simulation Test) is available from ASTM (www.astm.org). Effective immediately, version D6335-09 replaces D6335-03b. A summary of changes is included in the new test method.

Please remember to correctly report the new method-version (METHVER) in your data flatfiles transmissions to the TMC. The correct field name-variable designation is:

METHVER D6335-09

Any D6335 calibration test that is presently pending (assigned as of August 12, 2009, but not yet reported to the TMC) may be evaluated under the prior test method version if reported with method-version D6335-03b. Any D6335 calibration oil assigned August 13, 2009, or later must be run (and reported as) using the D6335-09 test method-version.
