REPORT PACKET REVISION NOTICE: COAT-20150312

VERSION: 20150312

EFFECTIVE DATE: April 12, 2015

DATE: March 12, 2015

TO: CAT Surveillance Panel

FROM: Sean A. Moyer

After the completion of matrix testing it was agreed that several changes needed to be made to the CAT Oil Aeration Test report forms and data dictionary. These changes included a change to the Average Aeration Value from a 30-50 hour average to a 40-50 hour average as well as the addition of several parameters. As such Version 20150312 has completed beta testing and is now available from the TMC Website. The effective date for this report package is April 12, 2015. If you have any concerns please contact me as soon as possible.

To facilitate the immediate reporting of updated PC-11 Matrix test results without delay, this change has already been implemented by the TMC and the TMC is able to receive data transmissions for the new version effective immediately.
