

AERATION TEST BACKWARD COMPATIBILITY DISCUSSION

December 1st, 2015

Elisa Santos

Performance you can rely on.

Goal

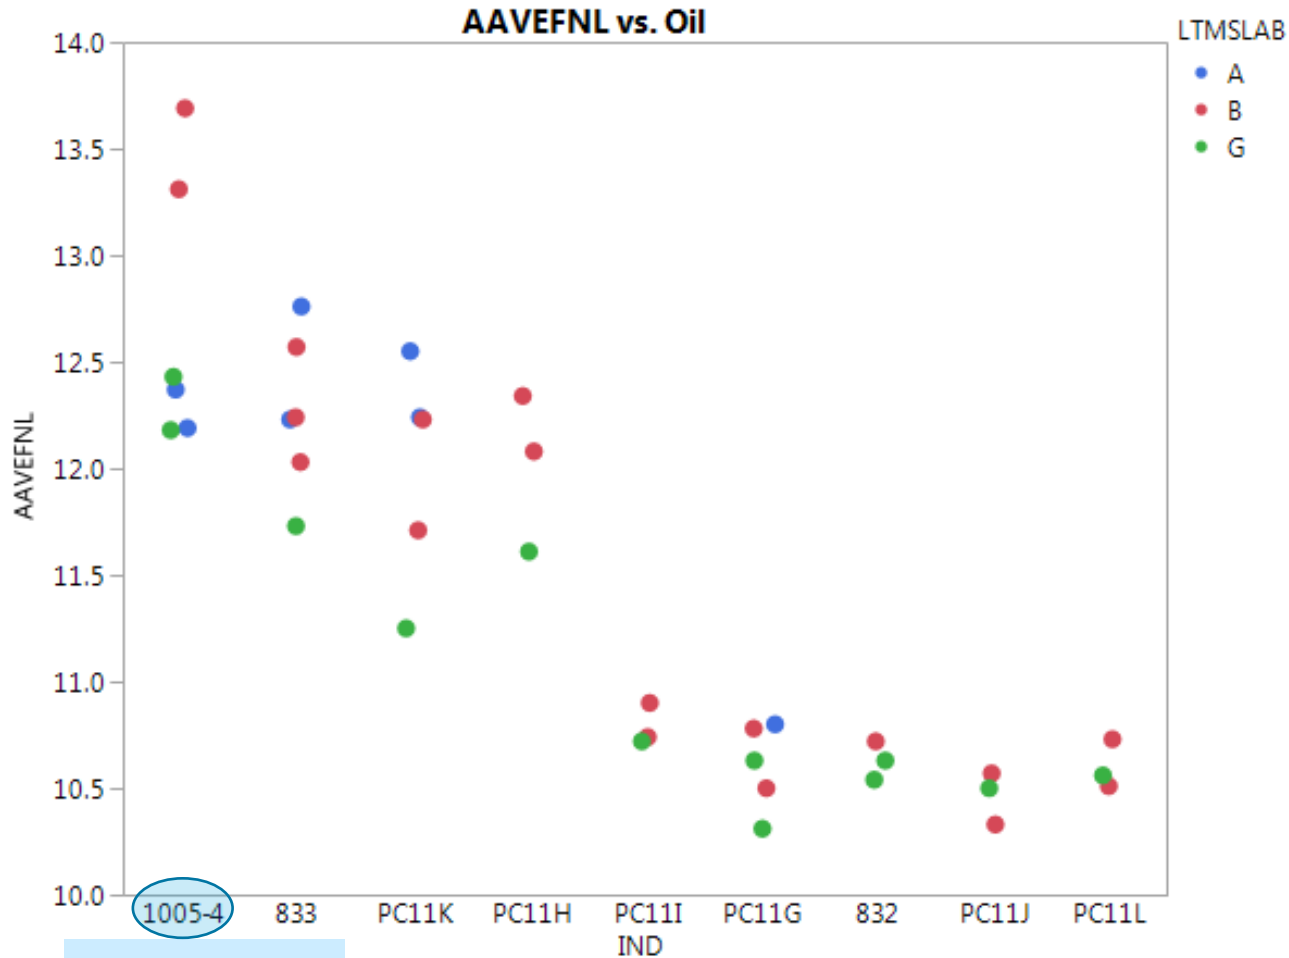

Present EOAT reference data that may help during the Aeration test backward compatibility discussion

Data:

- EAOT
 - Total 38 test results (chart = Yes)

- COAT
 - Total 37 test results (chart = Yes plus 1005-4)

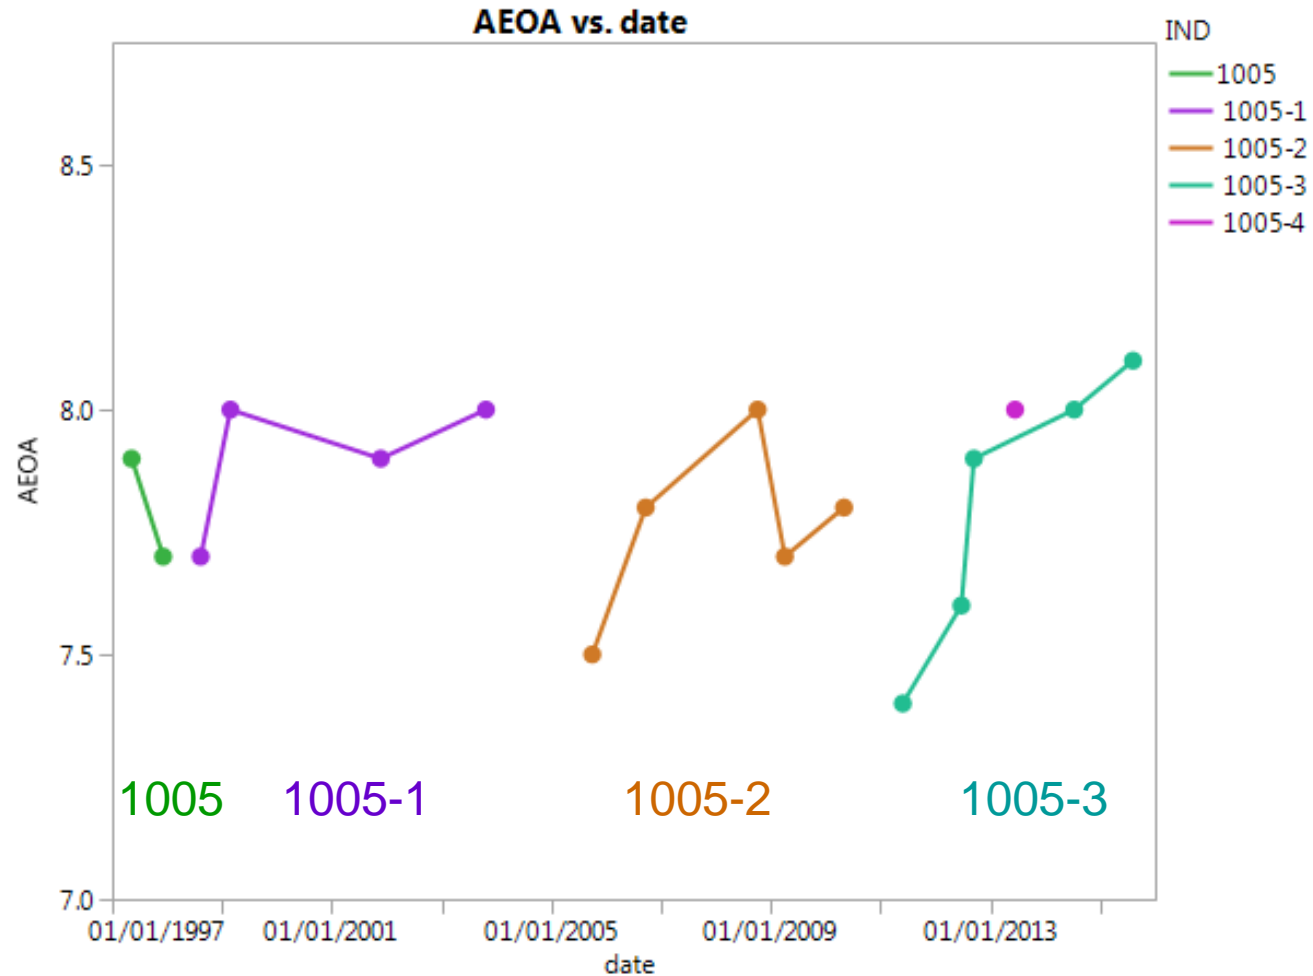

40 to 50 hr. Aeration % by Oil and Lab: ordered from highest to lowest oil mean

raw data:
did not
apply SAs

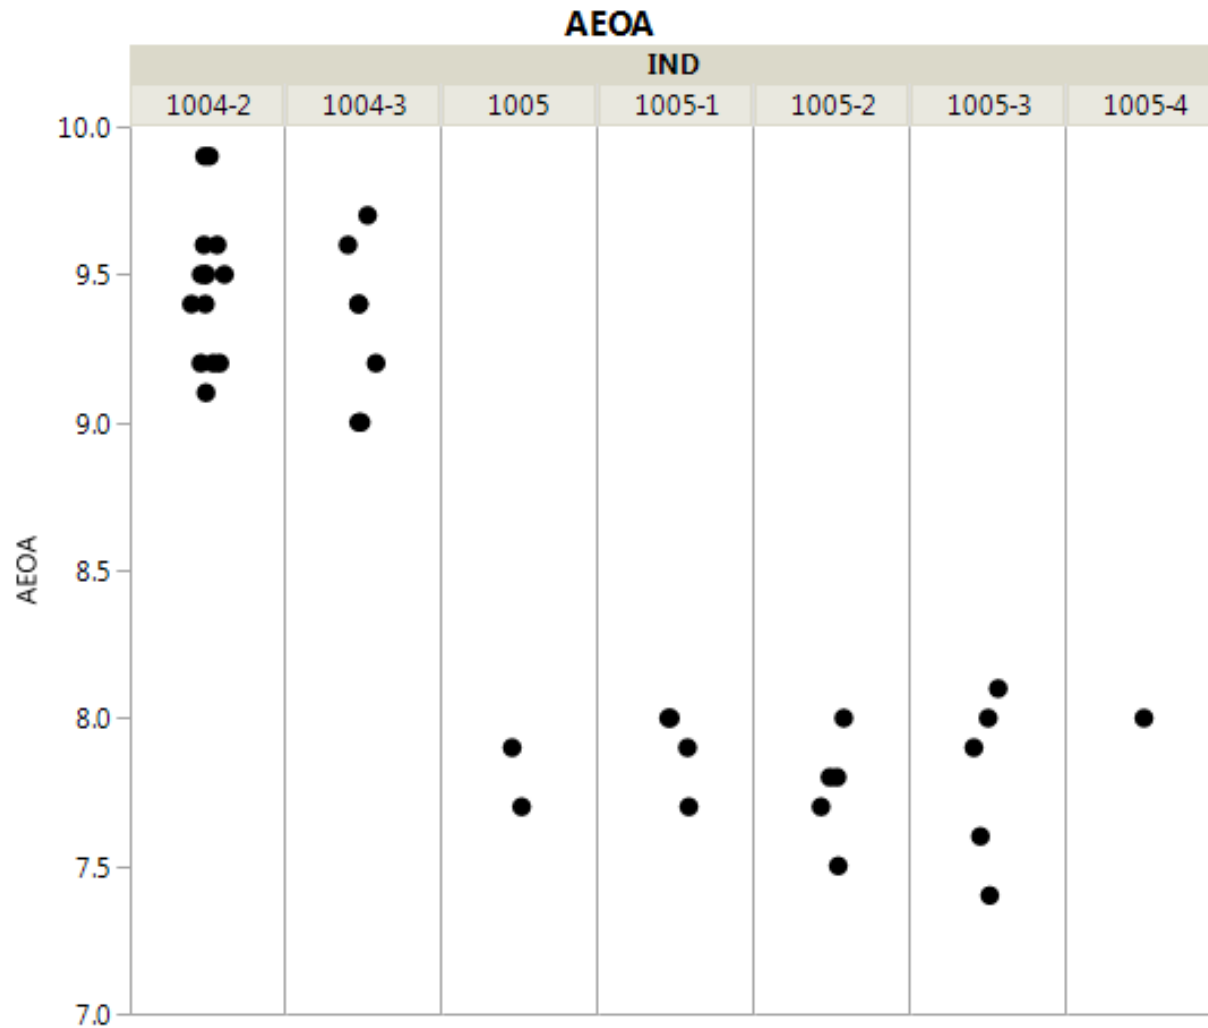

COAT controlled to a target pressure

EOAT: Aeration for 1005 and re-blends

Aeration is measured at ambient pressure

EOAT: Aeration by Oil

EOAT: Mean, Standard deviation and Median for 1005 and re-blends

IND	# of tests	Mean(AEOA)	Std	
			Dev(AEOA)	Median(AEOA)
1005	2	7.8	0.1414	7.8
1005-1	4	7.9	0.1414	7.95
1005-2	5	7.76	0.1817	7.8
1005-3	5	7.8	0.2915	7.9
1005-4	1	8	.	8
