**Agenda Items:**

- Batch B Reference Test Update
- EOAT Matrix Update
- Data reported on 1005-6
- Procedure Update Review

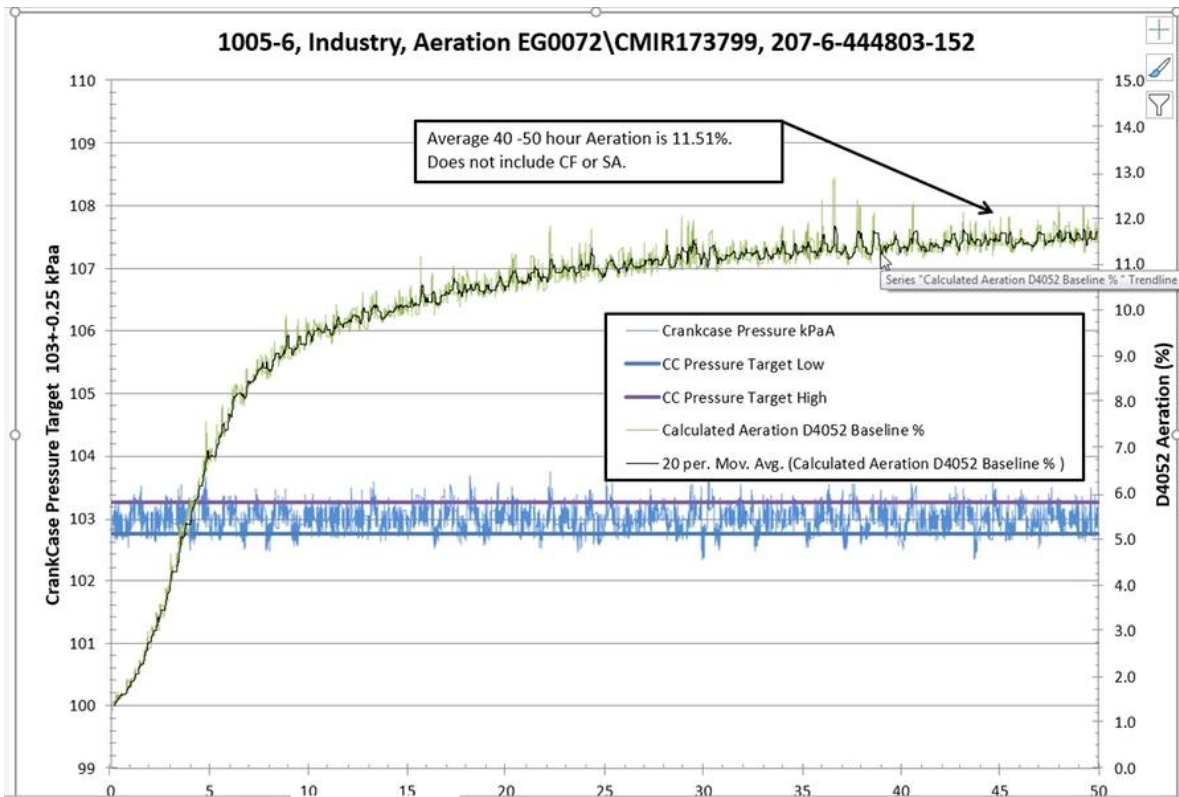

**Discussion:**

**Batch B Reference Test Update:**

- Lab G completed test on 833-1 and batch B filter. The test experienced shutdowns early in the test but will be valid. Aeration results slightly higher than target
- Lab A completed test on 833-1 and batch B filter. Results were on target. Aeration rise was noted as being steeper than historical.
- Lab B was delayed due to problems sourcing Decane
- Labs will send operational data to TMC to be posted and reviewed by SP
- There are currently no defined limits for filter batch approval

**EOAT Matrix Update:**

- Lab G results on 1005-6 oil batch A filter trended with historical results

- Need to discuss further to determine method on comparing results
- Lab A will run EOAT test on 1005-6 once oil arrives
- Data will be reviewed again during next SP meeting

**Procedural Updates:**

- Another meeting will be scheduled to discuss procedural updates

**Actions:**

- Schedule meeting for procedural review

**Next CAT SP Call: TBD**
