

1P Parts Identification Document

January 2019 Revision Level 0

View From Bottom Surface of Liner

Liner Part Number

Explanation: First code is the part number. Following is change level.

Recording Method: Include number as it appears.

Example Entry: 1Y-3997-08

Report Field Name: LINERP

Liner Date Code

Explanation: First code is the year (Ex. 15 = 2015). Second is the day of the year (Ex. 331 = 331 of 365). Machining date.

Recording Method: Record number as it appears

Example Entry: 15331

Report Field Name: LINERDC

Liner Sequence Number

Explanation: Machining sequential number

Recording Method: Record number exactly as it appears

Example Entry: 123

Report Field Name: LINERSN

Label on Shipping Box

	LINER – CYLNDR	
	D09M06Y16P478	
1Y-3997		08
1 PC		

Liner Box Date Code

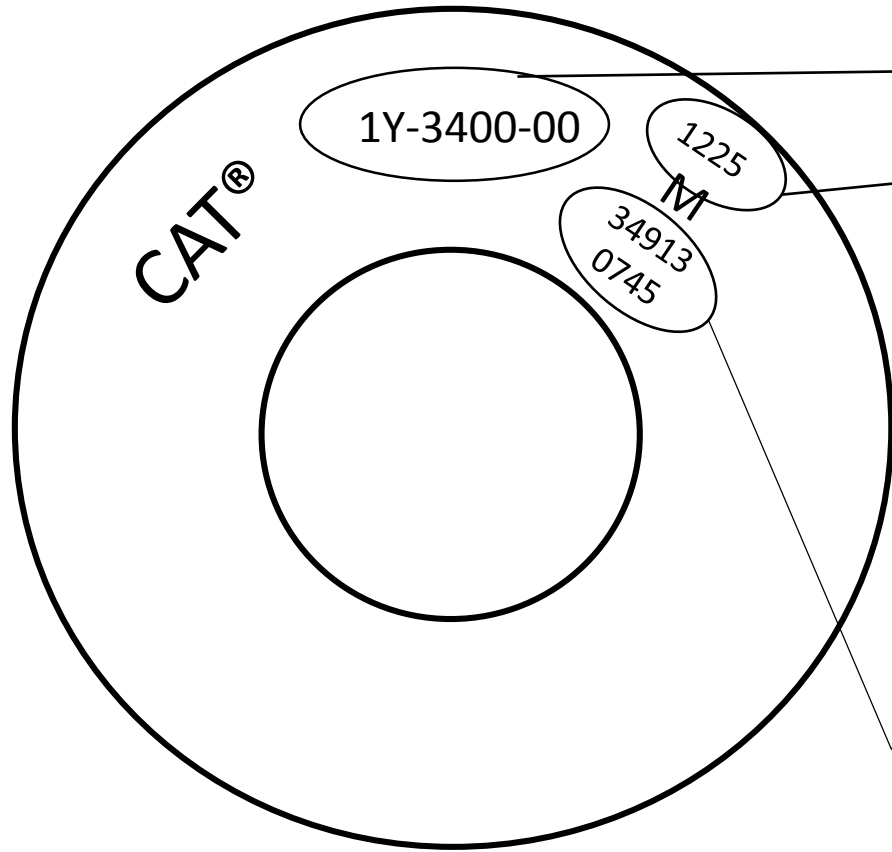

Explanation: Date when part was packaged

Recording Method: Record number exactly as it appears

Example Entry: D09M06Y16P478

Report Field Name: LINERBDC

View From Top of Piston Crown

Piston Crown Inspection Code

Explanation: Inspection code. First two numbers are the plant (12), next two are inspection code (25)

Recording Method: Record inspection code exactly as it appears

Example Entry: 1225

Report Field Name: CROWNIC

Piston Crown Part Number

Explanation: First code is the part number. Second code is the change level

Recording Method: Record part number as it appears

Example Entry: 1Y-3400-00

Report Field Name: CROWNPN

Piston Crown Date Code

Explanation: Top code is DDD YY format. Bottom code is production time HH MM.

Machining date.

Recording Method: Record time first, no hyphen. Use hyphen between time and date, hyphen between DDD and YY

Example Entry: 0745-349-13

Report Field Name: CROWNDC

Label on Shipping Box

	CROWN ASSEMBLY-PISTON	
	D09M06Y15P4752	
1Y-3400		00
1 PC		

Piston Box Date Code

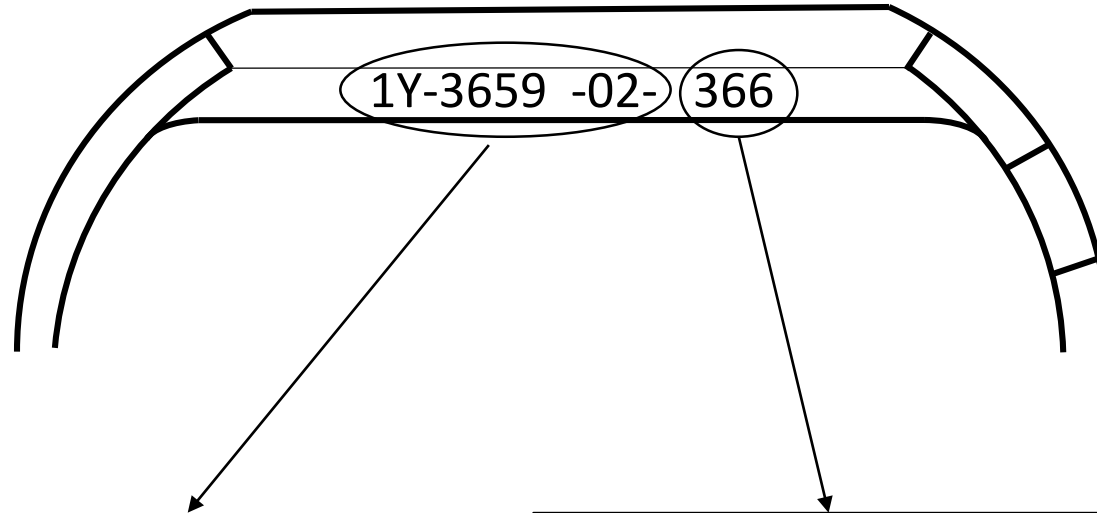

Explanation: Date when part was packaged

Recording Method: Record number exactly as it appears

Example Entry: D09M06Y15P4752

Report Field Name: CROWNBDC

View From Bottom of Piston Skirt

Piston Skirt Part Number

Explanation: First code is the part number. Second code is the change level

Recording Method: Record part number as it appears but with only one dash between part number and change level

Example Entry: 1Y-3659-02

Report Field Name: SKIRTPN

Piston Skirt Serial Number

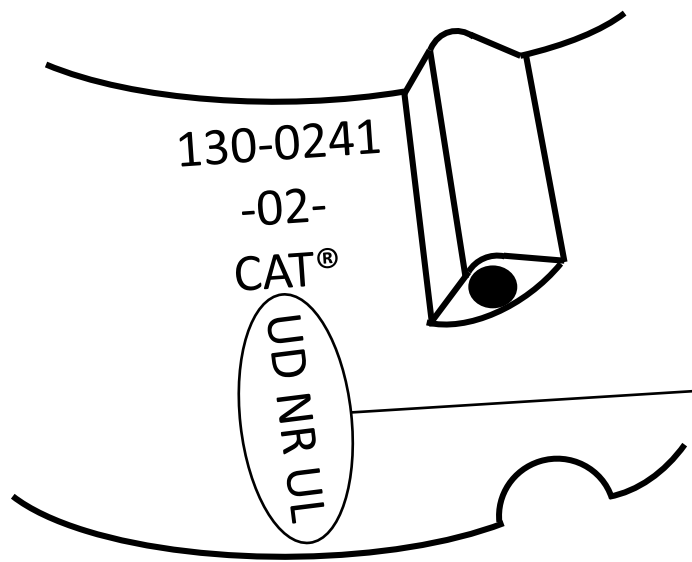

Explanation: Serialized skirt number

Recording Method: Record exactly as it appears

Example Entry: 366

Report Field Name: SKIRTSN

View From Inside Piston Skirt

Piston Skirt Casting Date Code
Explanation: Date when casting was made
Recording Method: Record exactly as it appears with no spaces
Example Entry: UDNRUL
Report Field Name: CROWNCDC

View From Top Surface of First Ring

B431

UP-1 1Y-3802 T CAT

Ring Serial Number

Explanation: Serial number. Also found on sticker placed on ring packaging.

Recording Method: Record number exactly as it appears

Example Entry: B431

Report Field Name: TOPSN

Ring Part Number

Explanation: Caterpillar part number.

Recording Method: Record number exactly as it appears

Example Entry: 1Y-3802

Report Field Name: TOPPN

Ring Supplier Code

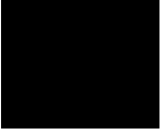

Explanation: Supplier Code

Recording Method: Record code exactly as it appears

Example Entry: T

Report Field Name: TOPSC

Label on Shipping Box

	RING 310714A8871L0	
1Y-3802	X	--
1		

Ring Box Date Code

Explanation: First six digits are in format DDMMYY. Date when part was packaged.

Recording Method: Record number exactly as it appears

Example Entry: 310714A8871L0

Report Field Name: TOPBDC

View From Top Surface of Second Ring

Ring Serial Number

Explanation: Serial number. Also found on sticker placed on ring packaging.

Recording Method: Record number exactly as it appears

Example Entry: B432

Report Field Name: INTSN

Ring Supplier Code

Explanation: Supplier Code

Recording Method: Record code exactly as it appears

Example Entry: T

Report Field Name: INTSC

Ring Part Number

Explanation: First code is part number. Second is change level.

Recording Method: Record number exactly as it appears

Example Entry: 1Y-3803-02

Report Field Name: INTPN

Label on Shipping Box

	RING 310714A8871L0	
1Y-3803	X	02
1		

Ring Box Date Code

Explanation: First six digits are in format DDMMYY. Date when part was packaged.

Recording Method: Record number exactly as it appears

Example Entry: 310714A8871L0

Report Field Name: INTBDC

View From Top Surface of Oil Ring

Ring Serial Number

Explanation: Serial number. Also found on sticker placed on ring packaging.

Recording Method: Record number exactly as it appears

Example Entry: B433

Report Field Name: OILSN

Ring Supplier Code

Explanation: Supplier Code

Recording Method: Record code exactly as it appears

Example Entry: T

Report Field Name: OILSC

Ring Part Number

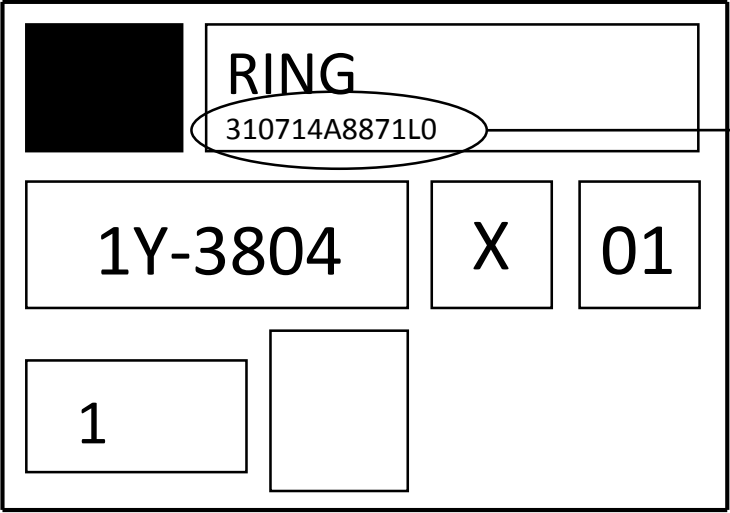

Explanation: First code is part number. Second is change level.

Recording Method: Record number exactly as it appears

Example Entry: 1Y-3804-01

Report Field Name: OILPN

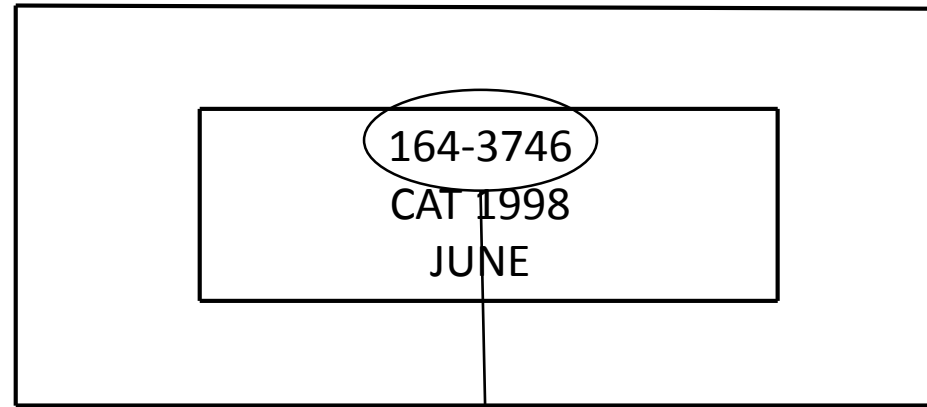

Label on Shipping Box

Ring Box Date Code
Explanation: First six digits are in format DDMMYY. Date when part was packaged.
Recording Method: Record number exactly as it appears
Example Entry: 310714A8871L0
Report Field Name: OILBDC

View From Top of EPROM

EPROM Part Number

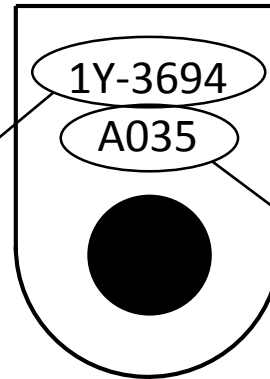

Explanation: Part number for EPROM

Recording Method: Record number exactly as it appears

Example Entry: 164-3746

Report Field Name: ECOMP

View From Bottom of Cooling Nozzle

Cooling Nozzle Part Number

Explanation: Part number for the cooling nozzle

Recording Method: Record number exactly as it appears

Example Entry: 1Y-3694

Report Field Name: PTUBEPN

Cooling Nozzle Serial Number

Explanation: Serial number for the cooling nozzle

Recording Method: Record number exactly as it appears

Example Entry: A035

Report Field Name: PTUBESN

View From Top Side of Injector

Injector Part Number

Explanation: Part number for the injector

Recording Method: Record number exactly as it appears with a hyphen between the first three and last four numbers

Example Entry: 211-3024

Report Field Name: NOZZLEPN

Injector Serial Number

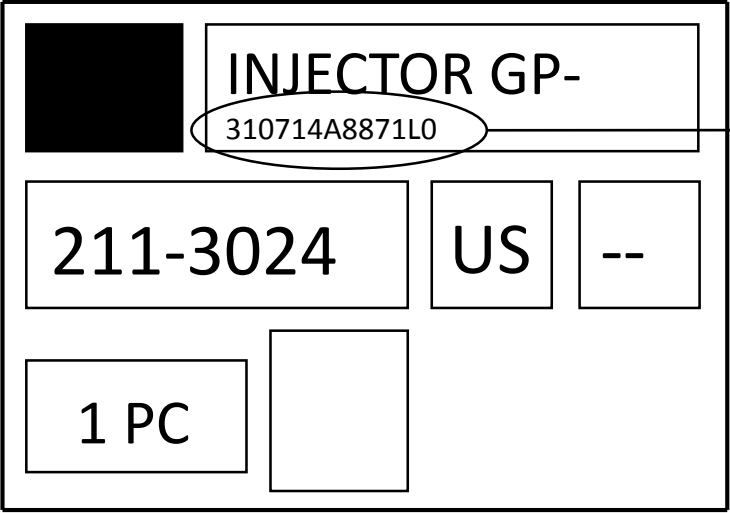

Explanation: Serial number for the injector

Recording Method: Record number exactly as it appears

Example Entry: 2993529

Report Field Name: NOZZLESN

Label on Shipping Box

Injector Box Date Code
Explanation: First six digits are in format DDMMYY. Date when part was packaged.
Recording Method: Record number exactly as it appears
Example Entry: 310714A8871L0
Report Field Name: NOZZLEBDC
