

PC-10 Matrix Status Report No. 5
June 3, 2005

Summary of Progress

Test Type	Planned Tests	Tests Started	Aborted / Invalid	Completed Tests^a
T-12	16	5	0	2
ISB	15	3	1	0
C13	26	8	1	0

a Operationally valid and reported to the TMC

General

An archive of PC-10 matrix status reports is available via a direct link on the TMC web site (<http://www.astmtmc.cmu.edu>). An Excel spreadsheet, with summary data for any reported tests, is also available. This spreadsheet is updated anytime new test results are received or there is a change in status for any test. For those interested in the full data bases for the T-12, ISB, and C13, direct links are provided.

T-12

All four first-round tests have finished. Two tests have been reported to the TMC and confirmed to be operationally valid. One second-round test was started on May 31, 2005. Based on laboratory estimates, the T-12 matrix is projected to be completed by August 15, 2005.

ISB

Three ISB matrix test starts have been confirmed. None have reached EOT. One test was aborted due to a turbo failure. The re-run of the aborted test is expected to start on June 7, 2005. Based on laboratory estimates, the ISB matrix is projected to be completed by August 31, 2005.

C13

Two tests have reached EOT but have not yet been reported to the TMC. Five other first-round tests are running, including the re-run of the aborted test which was started on May 27, 2005. Based on laboratory estimates, the C13 matrix is projected to be completed by October 15, 2005.
