**General**

An archive of PC-10 matrix status reports is available via a direct link on the TMC web site (<http://www.astmtmc.cmu.edu>). An Excel spreadsheet, with summary data for any reported tests, is also available. This spreadsheet is updated anytime new test results are received or there is a change in status for any test. For those interested in the full data bases for the T-12, ISB, and C13, direct links are provided.

**T-1**

Six operationally valid tests have been reported. One test has reached EOT but has not yet been reported. Four tests are currently running (includes one test with an estimated start date of June 29). Based on the limiting test stand, the projected T-12 matrix completion date is August 22, 2005.

**ISB**

Three operationally valid tests have been reported. One test has reached EOT but has not yet been reported. Another test is expected to reach EOT on June 30, 2005. Four tests are currently running (includes one test with an estimated start date of June 29). Based on the limiting test stand, the ISB matrix is projected to be completed by September 14, 2005.

**C13**

Seven operationally valid tests have been reported. Seven tests are running (includes two tests with estimated start dates of June 28 and June 29). Based on laboratory estimates, the C13 matrix is projected to be completed by October 15, 2005.
