MEMORANDUM: 03-003
DATE: January 15, 2003
TO: Single Cylinder Diesel Surveillance Panel
FROM: Scott Parke
SUBJECT: LTMS targets for 1M-PC oil 873-2

Upon the introduction of oil 873-2 into the 1M-PC test, the Single Cylinder Diesel Surveillance Panel conducted a new oil introduction matrix. The panel then held a conference call to select targets for use in LTMS plotting. The panel decided to use the same targets as are used for 873-1. These targets are:

	Mean	Standard Deviation
WTD	232.5	50.5
TGF	41.0	16.1

The LTMS document has been updated with these targets. They went into effect with the first 873-2 run on April 28, 2002. The current version of the LTMS document can be found on the TMC website at:
