August 25, 2008

ASTM consensus has not yet been obtained on this information letter. An appropriate ASTM ballot will be issued in order to achieve such consensus.

TO: Single Cylinder Diesel Mailing List

SUBJECT: Revised Wording for Change to Expiration of Calibration Period as Implemented by Information Letter 07-1

During a teleconference held August 30, 2007 the Single Cylinder Diesel Surveillance Panel approved a change to the requirement for when a calibrated non-reference test may start. Calibrated tests must now *start* before the end of the calibration period (formerly they were required to *end* before the end of the calibration period). The wording used to implement this change in Information Letter 07-1 was unclear. Revised wording is attached.

(Revises Test Method D 6750-06)

- 10.1.3 For each test type (1K or 1N), conduct a calibration test on a reference oil assigned by the TMC either 12 months from the start of the last acceptable calibration test or after 15 test starts, whichever occurs first. For each test type (1K or 1N), count only tests of the same type toward the allowable total of 15. Start non-reference tests before the end of the 12 month calibration period.
