ASTM consensus has not yet been obtained on this information letter. An appropriate ASTM ballot will be issued in order to achieve such consensus.

TO: Single Cylinder Diesel Mailing List

SUBJECT: Change to Expiration of Calibration Period

During a teleconference held August 30, 2007 the Single Cylinder Diesel Surveillance Panel approved a change to the requirement for when a calibrated candidate test may start. Calibrated tests must now *start* before the end of the calibration period (formerly they were required to *end* before the end of the calibration period).

The updated sections of ASTM Test Method D 6618 are attached.
