A new release of the ISB Viscosity Test (ISBV108) data dictionary and report forms has been finalized. This version fixed 2 issues found after the beta period and release of the last data dictionary version. The hours since calibration for each test length in the test number on Form 1 were in the wrong location and have been swapped. For the ISBV108 test the TGA soot measurements at 156 hours was removed on Form 4.

The Version is 20241021 and is available from the TMC Website. The effective date of this new report package is October 22, 2024 to facilitate the re-reporting of precision matrix test data. If you have any questions or concerns please contact me.
