REPORT PACKET REVISION NOTICE: ISM-20140113

VERSION: 20140113

EFFECTIVE DATE: March 15, 2014

DATE: February 17, 2014

TO: Cummins Surveillance Panel

FROM: Sean A. Moyer

During the September 12, 2013 Cummins Surveillance Panel teleconference, the panel agreed to split the operational data for non-controlled parameters into four stages instead of two.

During the November 19, 2013 Cummins Surveillance Panel teleconference, the panel agreed to add fields to document hardware information for the ISM in the test report. The additional fields are for crosshead, injector adjusting screw and injector pushrod batch identification.

The new Version 20140113 addresses these issues and is available from the TMC Website. These changes are effective March 15, 2014.
