Bob Salgueiro, Jim Gutzwiller - Infineum
Jose Starling - SwRI
Dan Lanctot - TEI
Jim Moritz, Josh Ward - Intertek
Jim Rutherford - Chevron Oronite
Ryan Denton, Phil Shelton, Christie Jackson -Cummins

Agenda:

Review wording and vote to incorporate the new LTMS into the ISB test.

There was discussion around Kevin O'Malley's draft LTMS wording as well as wording provided by Jim Rutherford that was discussed during a September 27-28 2017 statistician group meeting addressing the actions to take in the event a Level 3 Ei limit is exceeded.

There was discussion around what limits would apply to new test stands and the question of whether the test would continue to be a lab based system or if the test would transition to a stand based system and what the implications of that change would be.

The decision was to institute severity adjustments and continue with the lab based system and evaluate at a later date.

There was more discussion around the burden of entry of stands into the system. What would be the Ei and Zi limits of new test stands. The draft wording includes Level 1 Ei limits but should the limit be Level 3 Ei?

The remainder of the draft documents was reviewed and edits were made. The decision was to save the document and distribute it to the group for review. Another call will be scheduled to review the document and vote on its acceptance.

Next scheduled call will be Monday November 6th, 2017 at 10:30 EST.
