

DD13 Surveillance Panel Teleconference Meeting Minutes

June 19, 2017

11:00 AM CST

Call Participants:

Lubrizol - Patrick Joyce (Chairman), John Ahlborn
Southwest Research Institute – Jose Starling (Secretary), James McCord
Intertek - Jacob Goodale
Daimler - Suzanne Neal, Greg Braziunas
Infineum - Jim Gutzwiller, Elisa Santos, Bob Salgueiro
TEI – Derek Grosch
Afton – Bob Campbell

This Meeting was to discuss any times needed prior to the build workshop hosted by Lubrizol on June 21st – 23rd.

Build Workshop – The engine at Lubrizol is Setup and ready for the build workshop. There was a discussion in regards to adding in a short amount of time during the workshop to visit the COAT stand since the engineers from the other labs would already be there. It was expressed that if possible having the coat stand visit on Thursday or Friday would be best. Pat will get with Alex to see when the stand will be available.

Discussion will take place in Thursday SP meeting on what analysis needs to be completed on new batch liners prior to agreeing to run reference tests. However, it was agreed in a previous meeting that TEI is to perform surface measurements on a representative sample of liners from this batch and present finding to group.

Presentation to ACEA and AAA - Suzanne Neal covered the attached presentation which was presented to ACEA and AAA. The presentation is attached.

New Business:

The annual rating workshop is coming up and it was asked whether the DD13 Scuffing test should be added for ring and liners as an annual component. This will be discussed further in the followed meeting.

Next Meeting

Next meeting is scheduled for June 22nd 2017 at 12:00 P.M. CST.
