

**ASTM PC-9 Elastomer TF Report
To D02.B HDEOCP
May 10, 2001**

Round Robin Status

- 7 labs have been sent oil and Elastomers to run in a round robin
- 3 labs have finished testing and results are available
- Messages have been sent to the remaining labs urging them to complete their tests
- It is hoped to have the results completed within the next month so that results can be sent to statisticians for their analysis

Procedure Status

- The Procedure is posted to the ASTM web site until the end of the round robin for comment
- 15 persons have access including all 7 labs. If anyone would like access please contact Tom Boschert at Tom_Boschert@ethyl.com

Next Steps

- Finish the Round Robin and data Analysis (~6 weeks)
- Convene the Elastomer TF to review the data & analysis - make recommendations to ASTM B0.2 HDEOCP and ASTM D11.15
- D11.15 to ballot procedure with round robin data
- HDEOCP to incorporate into PC-9
