# Infineum's Comments

---

**Following is Infineum's comments in support of our disapproval vote on the ballot to incorporate the Sequence IIF into Categories CG-4 and CH04 with ASTM D 4485.**

**“Infineum votes ‘Disapprove’ based only on the verbiage included in paragraph 4.1.6.3, which describes the Sequence IIF. We do not believe that it is appropriate for an ASTM document to refer to oil drain intervals, as is mentioned in this paragraph. Upon the removal of the phrase ‘...and longer drain intervals ...’ we will change our vote to ‘Approve’.”**
