MEMORANDUM: 13-002
DATE: January 17, 2013
TO: Mack Test Surveillance Panel
FROM: Sean Moyer
SUBJECT: T-12/T-12A Report Form Updates

This memo is to inform you of editorial changes that have been made to the T-12 and T-12A report forms.

These changes are:

- Removal of wording referring to break-in procedure from Form 3 of the T-12A report since the T-12A procedure includes provisions for the test to be a flush and run test.
- Removal of Centrifugal Oil Filter Mass Gain, Oil Filter Delta P and EOT TBN measurement reporting on Form 4 of the T-12A report.
- Addition of target and typical values of test parameters on Form 5 of both T-12 and T-12A reports.

There have been no changes to the data dictionary for both tests and no beta testing is required.

The updated forms can be found here:
