Re: Seq. III CPD Technical Memo 19
OHT3F-008-6 & OHT3F-008-8 camshafts

Cc: Mr. Bruce Matthews / General Motors Powertrain
Mr. Rich Grundza/ Test Monitoring Center

This Technical Memo is intended to notify users of the Sequence III test methods that we have confirmed three camshafts out of specification with regards to the length of the nose from the thrust step to the end of the nose. This may cause the nose of the camshaft to extend beyond the gears. The specification for the upper limit for the length of the nose is 0.664 inches. OH Technologies, Inc. has taken corrective action with the vendor and has eliminated the possibility of these camshafts being shipped in the future. If a lab has any material at or above the upper limit please notify OH Technologies, Inc. for immediate replacement.

If there are any questions or comments regarding the aforementioned item please do not hesitate to call.
