REPORT PACKET REVISION NOTICE:      IIIHA-20170308

VERSION:                                    20170308

EFFECTIVE DATE:                        20170406

DATE:                                        March 9, 2017

TO:    Sequence III Surveillance Panel

FROM:                                        Richard E. Grundza

Recently, the Sequence III Surveillance Panel approved a number of changes to test numbering. During beta testing, several discrepancies were noted in field lengths of industry oil code (IND), average coolant in temperature (AECOLIN), average fuel temperature (AFUEL), average intake air temperature (AINAT), average speed (ARPM), average fuel rail pressure (APFUEL), average load (ALOAD) and average oil gallery pressure (AOILPRS). All these items were corrected and these changes are captured in version 20170308, which will become effective April 6, 2017.
