REPORT PACKET REVISION NOTICE: IVB-20160804

VERSION: 20160804

EFFECTIVE DATE: 20160809

DATE: August 4, 2016

TO: Sequence IV Surveillance Panel

FROM: Richard E. Grundza

Recently, the Sequence IVB Development Task Force approved an increase in the field length for variable SRPM1, IEXHPR1 and IEXHPR2 by 1. This change was necessitated by laboratories encountering difficulties in uploading results because the fields were too small in some cases. Version 20160804 is available from the TMC Website and is effective August 9, 2016. Because of the urgent need to have these data available for industry stakeholders, these changes were not fully beta tested and are being implemented in a limited amount of time.
