REPORT PACKET REVISION NOTICE: IVB-20190104
VERSION: 20190104
EFFECTIVE DATE: 20190118
DATE: January 4, 2019
TO: Sequence IV Surveillance Panel
FROM: Richard E. Grundza

Recently, the Sequence IV Surveillance Panel approved a number of changes to the test procedure, including changes in critical and non-critical parameters, removal of some operating parameters and removed several measurements. During beta testing, a field length correction was noted for transformed iron. These changes are captured in version 20190104. Because of the need to report BOI-VGRA results, the panel agreed these changes will become effective January 18, 2019.
