REPORT PACKET REVISION NOTICE: LSPI-20160201

VERSION: 20160201

EFFECTIVE DATE: February 11, 2016

DATE: February 2, 2016

TO: LSPI Task Force

FROM: Richard E. Grundza

Recently, a number of errors were noted with version 20160119 of the Low Speed Pre-ignition (LSPI) report form set. Specifically, the lab oil code was incorrectly labelled as LABCODE and a total of eight fields had mnemonics which exceed eight characters. As a result of these discrepancies, a new report form set was created. Version 20160201 is available from the TMC Website and is effective February 11, 2016. Please note that the effective date is less than one month as the initial matrix is expected to start by early February and that the Task Force members agreed on the need to implement these forms and data dictionary sooner than one month and Version 20160119 will not be implemented.
