REPORT PACKET REVISION NOTICE: VG-20030808

VERSION: 20030808

EFFECTIVE DATE: September 16, 2003

DATE: August 18, 2003

TO: Sequence VG Surveillance Panel

FROM: Richard E. Grundza

Because of a change in the fuel batch identifier used by the supplier of the fuel, it was necessary to increase the field length from 8 characters to 15. A form for the ACC Compliance statement was also added. Finally, a request was made to increase the field length for the character TSBBRK from 7 characters to 8 characters and to drop the HHH:MM description. Data should be entered in this field as BREAK-IN. As a result of these changes, the report forms and data dictionary have been revised. Version 20030808 is available from the TMC Website. These changes are effective September 16, 2003.
