REPORT PACKET REVISION NOTICE:      VH-20140703

VERSION:                                    20140703

EFFECTIVE DATE:                          August 4, 2014

DATE:                                        July 3, 2014

TO:    Sequence V Surveillance Panel

FROM:                                        Richard E. Grundza

During a recent conference call, the V Surveillance Panel agreed to remove the requirement to measure and record follower pin wear. These parameters have been removed from Forms 4 and 6. Version 20140703 has been successfully beta tested and is now available from the TMC Website. Please note that version 20140703 removes Average Follower Pin Wear from form 4, which was identified during beta testing.
