MEMORANDUM: 18-001
DATE: March 2, 2018
TO: Sequence V Surveillance Panel
FROM: Richard E. Grundza
SUBJECT: VG and VH Test Stand Dual Calibration

During the February 27, 2018 Sequence V Surveillance Panel conference call, the panel approved allowing VH stands to also calibrate as VG stands. The calibration periods for either test type are established separately and independently according to the respective test methods and LTMS. A stand is permitted to maintain both calibrations simultaneously and for the purposes of test numbering, a VG test will not count against the VH calibration period and a VH test will not count against the VG calibration period.
