REPORT PACKET REVISION NOTICE: VH-20170822

VERSION: 20170822

EFFECTIVE DATE: 20170905

DATE: August 23, 2017

TO: Sequence V Surveillance Panel

FROM: Richard E. Grundza

Recently, the Sequence V Surveillance Panel approved a change in rating technique for piston varnish, which has resulted in the renaming of the varnish parameters. The panel also agreed to apply a transformation to rocker cover sludge which required renaming of a number of parameters as well. During beta testing, errors were noted in the field lengths for several variables. These errors were corrected and all these changes are captured in version 20170822, which will become effective September 5, 2017.
