Re: CPD Technical Memo 01
OHT6E-001-2 Engine Assemblies

Cc: Mr. Rich Grundza/ Test Monitoring Center
Mr. Tim Cushing / GM

This Technical Memo is intended to notify users of the ASTM Seq. VIE Testing Method that the OHT6E-001-2 Engine Assemblies have been determined to be incomplete. During the acquisition of these engines, the industry and OHT's understanding was that the engine assemblies were complete engine assemblies, the same as historical acquisitions.

OHT and GM are currently working together to determine part numbers and availability of the components that were not supplied with the engine assemblies.

OHT will keep the industry up to date on availability of the required components for Seq. VIE testing.

If there are any questions or comments regarding the aforementioned item, please do not hesitate to contact me.
