REPORT PACKET REVISION NOTICE: VIE-20140121

VERSION: 20140121

EFFECTIVE DATE: February 12, 2014

DATE: January 21, 2014

TO: Sequence VI Surveillance Panel

FROM: Richard E. Grundza

The Sequence VI Surveillance Panel has assumed responsibility for a new version of the Sequence VI test, the Sequence VIE, which will be used to measure fuel economy for an upcoming category. As a result the Sequence VIE report form set was created. Version 20140121 is available from the TMC Website and is effective February 12, 2014. Please note that during beta testing of Version 20131211, a request was made to reduce the field length of the mnemonic ENGNO, engine number, from 15 to 5, with no negative responses. This change was accomplished and version 20140121 is now being issued with this field length change.
