

Sequence VIE FEI 2 Response Task Force

January 30, 2018 @ 9:00-10:00 CST

Toll-free dial-in number (U.S. and Canada):
(866) 588-1857

Conference code:
1908975

1. Roll Call (start 9:00 CST)

1.1. Membership

1.1.1 Adrian (Present), Andrew (Present), Bill, Charlie, Cliff, Dan (Present), Jerry, Katerina (Present), Rich, Todd (Present)

2. New Business

SCOPE: The Task Force will review data, chemical analysis for the 109 hour aging, and other factors for the VIE test looking for a root cause for a response shift affecting FEI 2.

2.1. VIE/F FEI 2 Severity

2.1.1. BSFC Break In

Analysis of the BSFC was completed by Todd, no significant difference was observed.

Analysis of the engine oil pressure does show a wider range than expected. Might want to review what could cause such a range in oil pressure from lab to lab.

2.1.2. 360K Batch VIE Fuel

Larger fuel batches will be available for seq. VI. This will help reduce variability of fuel.

3. Next Meeting

3.1. This is the last meeting for this task force.

4. Meeting Adjourned
