Sequence VIE Information Letter 20-2
Sequence Number 8
August 13, 2020

TO: Sequence VI Surveillance Panel

SUBJECT: Research Report Reference

ASTM International now requires research reports to be balloted as part of each test method for tracking purposes. This information letter is being issued to serve that purpose and correct footnote 22 that references the research report in the Sequence VIE test method. Once the research report is balloted and receives a number from ASTM International the test method will be changed to reflect the correct research report number.

Attached is the revised footnote of Test Method D8114.

Aleise Gauher
Materials Engineer – Fluids & Lubricants
GM Global Propulsion Systems

Frank M. Farber
Director
ASTM Test Monitoring Center
