MEMORANDUM: 06-081  
DATE: October 21, 2006  
TO: Sequence VIII Surveillance Panel  
FROM: Richard E. Grundza   
SUBJECT: Reference Oil 1006-2 Test Targets

On October 19, 2006, the Sequence VIII Surveillance Panel successfully approved the use of 03-06 batch bearings, via a teleconference. The motion to approve these bearings also specified that the targets for reference oil 1006 be used for charting reference oil 1006-2 BWL results. The current 1006-2 targets for SVIS will continue to be used for charting SVIS results. The test targets for 1006-2 will be reviewed and updated when 10 test results are obtained with reference oil 1006-2 on the 03-06 batch bearings. The targets to be used are shown below:

Parameter	Mean	Standard Deviation
BWL	15.9	4.85
SVIS	9.24	0.07

These targets are in effect for all tests completed on or after September 19, 2006.
