MEMORANDUM: 19-043

DATE: November 7, 2019

TO: Sequence X Surveillance Panel

FROM: Richard Grundza

SUBJECT: Use of Seq. X (CWT) Stands to Generate Used Oil Samples for Seq. IX (LSPI) tests

Recently, the Sequence X Surveillance Panel agreed to allow Sequence X test stands to generate used oil samples to be run in a Sequence IX test. Laboratories may conduct Used Oil Aging tests on calibrated Sequence X stands without effecting the Sequence X calibration period and these tests will not count against the Sequence X reference period. This change is effective October 7, 2019. Please note that wording for test stand dual calibration will be added to Test Method D8279 (Seq. X) and the Used Oil Aging procedure ([http://www.astmtmc.cmu.edu/ftp/docs/gas/Used\\_Oil\\_Aging/procedure\\_and\\_ils/](http://www.astmtmc.cmu.edu/ftp/docs/gas/Used_Oil_Aging/procedure_and_ils/)).
