Call to order:

Brian Koehler, the chairman of the Mack High Temperature Cyclic Test ASTM Surveillance Panel called the meeting to order at 11:15 a.m. on August 12th, 2009 at the TACOM facility in Warren, MI.

Chairman's Comments:

The chairman handed out copies of a proposed agenda. See attachment 1.

Review/ Revise Membership:

The chairman passed around a Membership/Visitor sign up list, see attachment 2.

Motion/ Action Item Recorder:

Galen Greene of Lubrizol volunteered to take notes during the meeting. (Thank you again Galen).

Approval of minutes from the last meeting:

All meeting minutes are posted to the TMC web location. The minutes will be considered approved if no corrections or comments are received within 14 days of postings.

Industry Severity Review:

Dale Smith, of Intertek, gave an update on the lab E severity issue. Lab E is still running at about 45,000 cycles for the category reference oil. This is about 10,000 cycles severe of the band's lower end. Lab E is ordering a different solvent (They had changed at the time of the severity shift). They will see if the solvent helps to shift severity.

TMC lab visits have not turned up any problems at lab E.

The Panel suggested that a working group be formed and that it view a build and test start at both lab E and lab A. This request was addressed by lab A's management at a later date and the decision was made by lab A to decline the request. Lab A did sell an additional set of its test parts to lab E as an attempt to assist.

Old Business:

There was no old business to be discussed.

New Business:

There was no new business to be discussed.

Next Meeting:

The next meeting will be at the call of the chairman.

Adjournment:

Meeting was completed at 12:15am.
