6555 Penn Avenue
Pittsburgh, PA 15206-4489
(412) 365-1000

MEMORANDUM: 01-122

DATE: October 1, 2001

TO: Steve Marty, Chairman, High Temperature Cyclic Durability Test Surveillance Panel

FROM: Donald Lind

SUBJECT: High Temperature Cyclic Durability Reference Test Status from April 1, 2001 through September 30, 2001

Summary

There was only one operationally invalid donated test reported to the TMC this report period. The test was invalid due to the fork hardness being less than 55R_C. Since there were no operationally and statistically valid tests this report period, severity and precision estimates could not be calculated. If there are any questions please contact the TMC.
