L-33-1 Information Letter 22-01
Sequence Number 30
January 16, 2022

ASTM consensus has not been obtained on this information letter. An appropriate ASTM ballot will be issued in order to achieve such consensus.

TO: L-33-1 Surveillance Panel
SUBJECT: Rater Calibration Requirements Moved to RCMS

On December 17, 2021, the surveillance panel approved modifications to the test procedure to reference the Rater Calibration Monitoring System document as the source of information for rater calibration requirements. Section 12.5 has been revised accordingly. This change is effective with the date of this information letter.

Anthony Lange
Chairman
L-33-1 Surveillance Panel

Frank Farber

(Revises Test Method D 7038-21a)

Replace the text of section 12.5 with the following:

12.5 For a valid rating, rate the test by an individual who has ~~participated in an ASTM sponsored, high volume gear rater calibration workshop within the previous 12 months.~~ met the requirements for rater calibration stated in the Rater Calibration Monitoring System (RCMS) document. The document can be found on the TMC website (astmtmc.org)
