IV. Summary of Panel Discussion, Consensus and Motions:

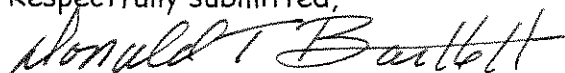

- Review of TMC 51-3 tests on new non-lubrited hardware V1L351/P4T771:

As directed (see motion # 4 from the September 25th 2004 panel meeting), we reviewed the results of the 4-lab tests to determine if there was acceptable discrimination between TMC 127 and TMC 151-3 before we proceed forward with full-matrix testing. The data is included as Attachment 1.

The panel determined that there was appropriate discrimination between the two oils. The results looked very good, consistent and encouraging on TMC 151-3. Mr. Koehler motioned, second by Mr. Koglin that the four labs proceed with the rest of the 44-test matrix. The vote was approved unanimously, 7 in favor, 0 opposed, and no abstentions. Targeted completion date of the matrix is as motioned at the August 25th panel meeting, December 15th, 2004. 3.

Being no further business to discuss Mr. Koehler motioned, second by Ms. Vettel, to adjourn the L-37 meeting at 2:20 p.m.

Respectfully submitted,

Donald T. Bartlett,

L-37 Surveillance Panel Chairman
