1.0 Membership and Agenda Review

2.0 Approval of Meeting Minutes

- November 7th, 2012 (Automation Alley – Troy, MI)

- December 18-19th, 2012 (SwRI – San Antonio, TX)

Motion # 1 - Motion to approve prior meeting minutes.

1st Thomas Gottwald / 2nd Dale Smith Motion was approved unanimously by voice vote.

3.0 Summary of Meeting Discussions

3.1 Non-Lubrited / Lubrited Test Conditions

W. Venhoff. Reviewed the test conditions did not get voted to be included into the procedure during the December meeting – This was most likely an oversight.

Motion # 2 - Motion to state the test conditions Lubrited and Non-Lubrited as presented during the meeting.

1st Wes Venhoff / 2nd Brian Koehler Motion was approved unanimously.

3.2 Review of Motions on V1L528

W. Venhoff reviewed the motions passed in December on the non-lubrited and lubrited hardware. The TMC chart with transformed corrections and exclusions for all test conditions was reviewed.

3.3 Overview of Next Steps

S. Parke provided a summary of status and next steps following the motions made in December. The pre-ballot has been distributed and has 30 days (March 7th) for comments. This process is followed as there were negatives on the motion. If there are any negatives, these items are directed back to the panel to address, and these issues can be dealt with, and the negative will be withdrawn, or it will have to be voted on at the D level and deemed non-persuasive. This semi-annual meeting is in December/June.

B. Koehler – would like to see the other action item of the modification for the data dictionary/forms updated. Scott shared that this is in the works.

B. Koehler would like see clarification if we can run tests at the moment. The group had mixed feelings on this topic based on how the earlier motions were worded.

B. Koehler clarified that he will be indicating to his customers that he can run tests, however will not be deeming these tests as Valid as the hardware is somewhat in limbo at least for the next 30 days.

W. Venhoff – per discussion with the group present, the hardware is not approved at the time of this meeting till we get further clarification from the ballot process.

S. Parke – this raises a question of if a lab has run a candidate test on V1L500 hardware (previous batch) after the reference on V1L528, then that specific test is currently in limbo.

B. Koehler requests that if there are any negatives from the balloting process that meetings are held at earliest convenience. Key individuals need to be in attendance at this meeting and bring data to outline their point.

4.0 New Business

W. Venhoff 1st / D. Smith 2nd – Motion to nominate C. Prengaman as new L-37 Chairman.

5.0 Adjournment

Motion to adjourn . Motion was approved unanimously by voice vote.

Respectfully Submitted

Chris Prengaman
