The meeting was called to order at 1100 EST.

**1.0 Meeting Discussion**

The group discussed that a lab had run the lab built approval matrix as outline in prior minutes, but did not perform instrument calibration immediately prior to the 3 matrix runs.

After much group discussion, the consensus was the lab had met the requirements and was approved to run lab built axles as written in the procedure, but these runs did not qualify as the “stand reference” due to the lack of instrument calibration immediately prior to a reference run as prescribed in 9.4 in the procedure.

**2.0 Adjournment**

Motion to adjourn.

Respectfully Submitted

Chris Prengaman
